Projects

- **Online nursery Management System**

This project is based on the Plant sale shop and it's a web application. In this application customer can view all the available Plants in shop online. When a customer views a Plant, all the specifications of that Plant along with the Images is displayed. If the customer wants to buy, he can easily click on buy button, then the owner will get the contact details of customer and eventually he will contact the customer for sale. This web application is built with python- Django as framework and SQLite3 as its database.

- **College Management System**

The "College Management System" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and, in some cases, reduce the hardships faced by this existing system. Moreover, this system is designed for the particular need of the company to carry out operations in a smooth and effective manner This web application is built with java and SQLite3 as its database
